

Evolving Relevance of Security Operations Center as a Service (SOCaaS)

To overcome the defaults of dedicated in-house SOC, organizations are outsourcing, entirely or partially, SOC services to managed security service providers (MSSPs).

Top Reasons for Using MSSPs*

80%

Said 24x7 support, access to security talent

57%

Said ability to protect against advanced threats

49%

Said ability to improve performance

*As reported by CISOs and those responsible for cybersecurity

Growing Relevance of MSSPs in Saudi Arabia

As Saudi Arabia progresses towards becoming a leading cyber-resilient nation, investments in managed security services are rising at a stellar pace. This is expected to foster the stability and excellence envisioned by the National Cybersecurity Authority (NSA).

US\$208.90 Mn

KSA's expected market volume of security services by 2028

US\$11.82

Projected average spend per employee in the security services segment (2023)

US\$179.04 Mn

Expected revenue from managed services & professional services (2023)

SAMI-AEC's SOC-as-a-Service assists IT teams by centrally managing and shielding organizations' cyber networks, assets, and devices. Such advanced and scalable solutions are tailored to effectively tackle and mitigate cybersecurity threats.
