

Strengthen Your SOC with **Managed Security Service Providers**

In hybrid cloud environments, managed security service providers (MSSPs) are highly capable of handling security operations such as SIEM, EDR, and MDR more efficiently.

Benefits of Managed Security Services

Lower costs

Access to experienced personnel

Faster response times

Organizations are **Outsourcing SOC Capabilities** to Better Manage Threats

SOC Capabilities	Outsourced SOC*
Pen testing	87%
Red teaming	57%
Threat intelligence (attribution)	47%

(Outsourced SOC indicates percentage of organizations outsourcing SOC capabilities)

SAMI-AEC's SOCaaS Offers Next-Level Cybersecurity to Enterprises

SAMI-AEC's SOCaaS can assist in scaling cybersecurity across organizations. While proactively managing cyber networks, devices, and assets, SAMI-AEC's managed security services ensure enterprise-wide security by building robust and impenetrable cybersecurity systems.

How can SAMI-AEC help?

Round-the-clock cyber security

Reduces burden on internal IT teams

Scalable system tailored to all business types

Web portals facilitating better insights
