

Blockchain Solution

Blockchain is a new technology allowing sharing of information in a very secure way within a distributed network. It simplifies the infrastructure to reach availability, integrity, scalability and resilience. It could be used publicly or in private networks (LANs, WANs, and MPLSs).

Main Features of Block Chain

- ◆ Simplified infrastructure
- ◆ Fault tolerance
- ◆ Durability and attack resistance
- ◆ Reliability and highly available
- ◆ Transparency and immutability
- ◆ Provenance and accountability

AEC has designed and built an application based on blockchain technology to be used for assets tracking. The product is fully customizable to meet any business's needs.

Since it is built to have high scalability, it has the ability to perform millions of transactions per day.

App Features

Micro-services based

Highly scalable

Built-in reports / dashboards

Support Arabic/English

Easy to use

Mobile / tablet friendly
